SUPPLEMENT TO REPORT NO.

THE COMMENT CONTAINS INFORMATION APPEARING THE MANGEN, DEFENCE FOR THE STRING STRING THE REARING OF THE STRONGS AND A N. S. C. OF AND DI. SE SCHOOLD. THE THEORY OF THE STRUCTURE OF SP THE DESCRIPTS IN ANY MANGER OF AN ENGINEERING OF THE STRINGS OF STRINGS OF THE STRUCTURE OF THE FORE OF PROBLEMS

- 25X1 i. The Solich broadcasts of the Voice of America, Radio Free Europe, EBC and the Nadric, Ankara, Paris and Rome Stations are eagerly and regularly listened to by the population of Lodg.
 - 2. In the summer of 1953 new local jumming stations were built, often making reception very difficult or even impossible.
 - The main jamming station for Lods is in the Lagiewniki section of town. Masts of the station cen be seen from the right side of the Lods to Agiers highway. The station operates on the medium wave lengths. Its probable mission is to deaf in the Voice of America which broadcasts on the medium waves. It is able to deaf in VOA almost completely, so that reception of its programs is impossible regardless of the kind of radio used.
 - 4. The following jaming technique is used: A very strong wave spread widely over the scale is modulated by two different broadcasts at the same time, for instance, Morse code and a speech, recorded on a magnetophone tape and broadcast backwards. Consequently only squealing, equeaking, smarling and other instance describable sounds can be heard.
 - 5. On long waves the VDA progress can sometimes be received very well, but the schedule for Polish progress on this frequency was unknown. Most people, therefore listen only to short-wave broadcasts, but here also the juming is conscious so successful that it is difficult to understand the progress.
 - 6. Resat jemmes are the broadcasts from London and Paris.
 - 7. In the summer of 1953 the best reception and the most free of jamin, was on the 19 meter band, but the same stations could hardly be heard on the 25, 31, 52 and 49 meter bands, and this only through the jaming.
 - 8. All attempts to separate the jamming from the programs, according to the instructions given by radio, were unsuccessful.

- 9. There is no regulation in Poland prohibiting listening to foreign broadcasts; however, if someone is cought, his set is confiscated and he is arrested for spreading hostile propaganda.
- 10. In spite of these facts the people often abstain from the most necessary items to save money for a short-wave radio.
